

Mr. Lawrence Houston

2 July 1956

Chief, Communications Division

Services Rendered to State Department

25 YEAR RE-REVIEW

Since October, 1955, the Communications Division has rendered following to the State Department:

(a) Handling miscellaneous traffic in both SSU and state cipher from Bangkok, Singapore, Batavia, Saigon, and Hanoi.

(b) Provided on a loan basis five electromagnetic typewriters.

(c) Established and continues to operate a radio circuit from Teheran to Asmara.

(d) Deposited with State Department emergency radio equipment at: Cairo, Teheran, Istanbul, Athens, and five places in CBI and SEAC areas.

(e) Established liaison on personnel matters involving the exchange of details concerning grades and specifications and reference of personnel unsuitable to SSU needs.

At the present time we are negotiating with the State Department relative to their informal request that we establish a considerable radio network for them in the Near East. A formal request is, we understand, now on its way to us through channels.

We have also been requested informally to make available, if possible, certain teletype equipment but no positive action has been taken up to this time, due principally to our own equipment limitations.

JOHN W. COFFEY
Chief, Communications Division

Mr. Lawrence Houston

2 July 1946

Chief, Communications Division

Services Rendered to State Department

Since October, 1945, the Communications Division has afforded following to the State Department:

(a) Handling miscellaneous traffic in both SSU and State cipher from Bangkok, Singapore, Batavia, Saigon, and Hanoi.

(b) Provided on a loan basis five electromatic type-writers.

(c) Established and continues to operate a radio circuit from Teheran to Asmara.

(d) Deposited with State Department emergency radio equipment at: Cairo, Teheran, Istanbul, Athens, and five places in CBI and SEAC areas.

(e) Established liaison on personnel matters involving the exchange of details concerning grades and specifications and reference of personnel unsuitable to SSU needs.

At the present time we are negotiating with the State Department relative to their informal request that we establish a considerable radio network for them in the Near East. A formal request is, we understand, now on its way to us through channels.

We have also been requested informally to make available, if possible, certain teletype equipment but no positive action has been taken up to this time, due principally to our own equipment limitations.
